TP001	Test Plan benjerry.co.uk		Introduction	This document represent a sumary of what i intend to test for certain modules (some features from the footer elements, navigation menu from header, flows for details obtaining for products and posibilities to order them) and some brief check for some non-functional requirements (Response time and toolbar menu accesibility - visual aspect).	June 29, 2023 03:49:40
			Scope	Verify that essential features of the website, such as navigation menus and form submissions are working as intended. Validate that the core functionality, such as displaying product information and social media integration is functioning correctly. Evaluate the user experience of the website by assessing its ease of navigation, intuitiveness, and overall usability.	June 29, 2023 03:49:40
			Out of scope	The tests will not be run on any other browsers (Safari, Edge, etc) except Chrome or devices (eg. smartphones, tablets etc) due to time constraints.I will not have an end-to-end flow for a product order due to the fact that I will be testing an app from another country.Security also will be out of my scope.
